Use Enrollment Key vs. Use Discount Code

Business Account · https://servingalcohol.com/kb/business/enrollment-key/

This article explains the difference between a Serving Alcohol enrollment key and a Serving Alcohol discount code.

For our business accounts, we will issue specific enrollment keys. The enrollment key will use all lowercase characters with numbers. No capital letters and no spaces. Be sure to enter the code in lowercase letters as it appears in your instructions (i.e., mycompany67).

We offer discount codes and enrollment keys. Use the two separate boxes in the payment section. If your employer has a business account with us, enter the **enrollment key** you received after clicking **I have an Enrollment Key**. Don't enter the enrollment key under **I have a Discount Code** button. It will not enroll you in your pre-purchased course (see screenshot below).
