Clear Cache in Google Chrome on Windows

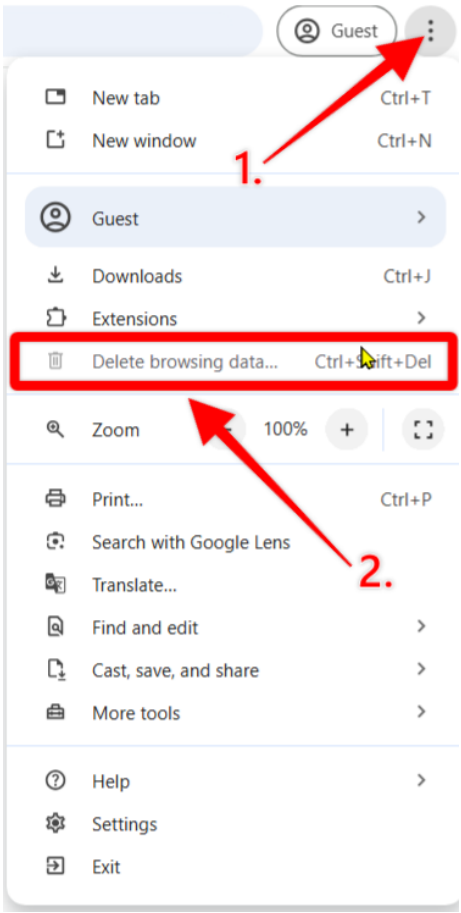
Clear Browsing Data · https://servingalcohol.com/kb/cache/clear-chrome-windows/

This document explains how to clear the web browser cache in Google Chrome before returning to a Serving Alcohol course.

NOTE: To quickly get to the setting, on any Google Chrome webpage, select CTL+Shift+Delete

1. Click on the settings icon in the top right of the address bar. In Google Chrome, this appears as three vertical dots; in older versions, there will be three horizontal lines or a wrench icon.

2. From the menu, select **More Tools**> **Clear browsing data...**.



3. Check the following:

- **Browser history**
- **Download history**
- **Cached images and files**

*** Be sure to select the optional time range: **All time**

For the **Time range**, select **All Time** for the drop-down box.

* Do not check to clear your passwords; you want to keep those.
