The Instruction Page Within Your Course

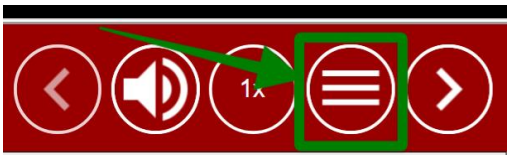

Getting Started · https://servingalcohol.com/kb/start/instructions-page/

This article provides a brief overview of the Instructions page located inside each Serving Alcohol course.

The Instruction Page Within Your Course

State alcohol certification courses include an instructional page. It explains each button's function to help you complete your course easily. The instruction page within the course will require you to listen and view it all the way through. If your audio or speakers are off, turn the volume up to listen to the entire course. The instruction page is only about a minute long.

At the very end of the instructions, you can move forward to the menu of the course by clicking the menu button in the top banner. From the menu, select the first topic from the top of the list.

If you need any additional help beyond the introduction page, please let us know by sending a quick message through the **Contact Us** web portal.
